Maximize the storage utilization with Veritas Storage Foundation Dynamic Storage Tiering and Multi-tiered ETERNUS Storage.

Summary

Symantec and Fujitsu offer a solution to improve storage cost of ownership with the combination of the Dynamic Storage Tiering (DST) in Veritas Storage Foundation™ and the Eco mode of ETERNUS Storage Systems.

Joint solution

DST is an industry unique feature of Veritas Storage Foundation and provides a file system with multiple tiers of storage volumes. By setting a policy, DST dynamically migrates information between tiers to maximize the utilization of storage space and minimize the storage cost. The Fujitsu ETERNUS Storage System offers multiple tiers of storage space in a single unit and also offers MAID functionality (Fujitsu refers to it as Eco mode), which spins down a certain group of disk drives based on a policy. Drives will spin up automatically when receiving an I/O request, or with a change to the policy setting. By using Storage Foundation and ETERNUS tiered storage, customers can improve storage utilization, and ETERNUS MAID functionality will further improve the total cost of ownership (TCO) as it reduces power consumption and cooling.

About company

Fujitsu is a leading provider of customer-focused information technology and communications solutions for the global marketplace. Pace-setting device technologies, highly reliable computing and communications products, and a worldwide corps of systems and services experts uniquely position us to deliver comprehensive solutions that open up infinite possibilities for our customers' success.

Benefits

- Customers can improve their TCO by utilizing its superior features and scalability
- You can start small with ETERNUS2000 and expand as your data grows, using compact, cost-effective storage systems with enterprise-class system reliability
- ETERNUS4000 is a mid-range storage system with enterprise-class functions and performance
- ETERNUS8000 have optimum performance and security for enterprise-class, mission-critical heterogeneous environments
