

# Own Your Space. Keep It Safe!

## Keep Safe

Keep Safe your personal information—all of it! Never give out your real name, address, phone number, the name of your school, or a picture of yourself to anyone online. Also, use passwords whenever you can.

## Keep Away

Keep Away from Internet strangers no matter what they tell you, because you have no way of knowing who they really are. Don't talk to strangers online and never meet them face-to-face.

## Keep Telling

Keep Telling your parents or a trusted adult about everything you see on the Internet. Always tell them when something online makes you uncomfortable.

## And Remember...

**The Internet is forever**—Everything you do on the Internet is tracked, monitored, and stored.

**Anonymity is a myth**—ISPs, governments around the world, marketers who want to sell you junk, and even savvy predators can track your interests, follow your digital footprints, and figure out who you are.

**Cyber ethics apply to everyone**—Online harassment can lead to legal implications. Be the good person online that you are when you're offline.

**Gaming**—Always keep your firewall on.

**Shopping**—Never provide passwords to anyone online, no matter who asks.

**Downloading Music**—Install software to guard against spyware and unwanted adware.

**Socializing Online**—Never meet in-person someone you met online.

**Back up your files regularly**—including digital photos, music, and important files.
