

## What does Norton Internet Security really secure?

Norton Internet Security 2006 automatically stops hackers, protects your privacy, and boots out viruses, spam, spyware, and phishing email in a flexible and discrete way. Components of the suite include:

- Norton AntiVirus™
- Norton™ Personal Firewall
- Norton™ Privacy Control
- Norton AntiSpam™
- Norton™ Parental Control

## Key Points

- Enjoy your computer with confidence, knowing you have automatically updated\* protection against viruses, Trojan horses, and worms.
- Surf the Web without being watched by dangerous spyware and without getting hijacked and redirected to spyware download sites.
- Ease your mind at the click of a button, checking your entire system for security holes whenever you want.
- Keep spam and phishing email out of your inbox and keep deceptive pop-up windows and banner ads off your screen.
- Open email and IM attachments without worry, knowing they've been scoured for threats.
- Stay connected all the time—with hackers and identity thieves locked out and private information locked in.
- Protect your kids from unsafe and unsavory Web sites.

## What's New?

### Stronger Security and Data Protection

Customers now have a simple and easy way to view browser security settings, Windows password strength, and risks within hidden shared folders, as well as unneeded services. Simplified “fix” and “undo” functions make it easy for anyone to use, even if they have limited computer knowledge.

#### Benefits

- Requires less involvement in managing security settings.
- Provides peace of mind by the friendly automated found and fix design.

### Less User Interaction Required

With its smart learning feature, Norton Internet Security 2006 improves its “out-of-the-box” protection.

*Benefit*—Offers a simple and successful installation experience for users.

### Adaptive Personalized Protection

The new Norton™ Protection Center is a common console that automatically/dynamically tailors itself to an individual user's preferences, behavior and environment to provide a personalized view of their computer protection status.

*Benefit*— Provides one central point of reference of the user's security status.

## Key Continuing Features

### Provides “Out-of-the-Box” Protection

Norton Internet Security combines seven essential security functions into a single, easy-to-use integrated suite

### Guards Against Hackers & Intrusions

Defends against malicious hacker attacks, unauthorized intrusions, and attempts to access your personal information without your knowledge.

### Offers Powerful Virus Protection

Norton AntiVirus is the world's most trusted antivirus solution.

### Protects Private Information

Provides easy to use tools to safeguard users' personal and confidential information and to maintain their online privacy.

### Automatic Filtering of Spam Email Messages

Helps users with any standard POP3 e-mail connection to identify spam e-mail messages by adding the word “Spam” in the subject field. Users can then select which action to take, such as delete the messages or automatically place them in a designated folder for later review.

### Helps Keep Children Safe on the Internet

- *Parental Control Wizard*— Enables users to set up different Internet access privileges for each person in their household.
- *Program Control*— Enables parents to limit the applications their kids can use online. Parents can also prevent children from submitting personal information on the Web without their approval.

## System Requirements

For a complete list of system requirements for Norton Internet Security 2006, please see additional product materials.
