

What is Norton SystemWorks Premier 2006?

Norton SystemWorks Premier 2006 helps customers optimize their computer experience. It contains all the benefits of Norton SystemWorks plus the extra benefit of having THE leading back up solution in Norton Ghost. Through the One Button Checkup, customers can fix problems easily and ensure that their PC is running at its best. Norton SystemWorks Premier provides out of the box protection from malicious threats such as viruses, worms and spyware and it allows customers to roll their computer back to a safe point in time if anything goes wrong. And because it includes a world class back up solution, customers are assured that it will automatically back up and recover *everything* on your computer. It provides advanced tools at the customers' fingertips.

Includes Full Version Products of:

- **Norton AntiVirus™:** Protects your PC from virus threats and provides automatic removal of viruses, worms Trojan horses and spyware.
- **Norton GoBack™:** Recovery from PC problems by restoring your computer to a healthy state or just retrieve files that have been accidentally deleted or overwritten.
- **Norton Utilities™:** Enables the user to optimize the computer for performance, permanently remove information as well as find and fix common computer problems.
- **Norton Cleanup™:** Deletes temporary files, leftover files from Internet sessions, and other unneeded files that can jeopardize privacy, waste disk space, and slow down PC performance.
- **Norton Ghost™:** Backs up everything on the user's PC – operating system, settings, files, folders and preferences.
- **Symantec™ Recovery Disk:** Users who encounter an unbootable PC will have the opportunity to restore their system and recover critical files.
- **Process Viewer 2.0™:** Identify software processes running at a specific point in time.
- **System Optimizer 2.0:** Allows users to turn on and off almost any Windows XP shortcut to improve the overall appearance of Windows and keep others from changing the settings.
- **Performance Test 6.0:** Allows users to run tests and benchmark their tests based on comparable computers' results.
- **CheckIt® Diagnostics:** Allows users to run hardware evaluations on the computer.

Key Messages

- Surf the Web, download files, and open email and IM attachments with confidence, knowing viruses, dangerous spyware, Trojan horses, and worms will be detected and removed automatically.

- Enjoy your computer at it's best, making sure it's clean, repaired, and running at top speed with the click of a button.
- Recover from trouble, whether it's a system crash, accidental file deletion, improper software installation, or a Windows® glitch.
- Breathe easy when new viruses surface, assured your protection is automatically updated.
- Explore the Internet without being watched by dangerous spyware or adware, and without getting hijacked and redirected to spyware download sites.
- Quickly and permanently remove unwanted Internet clutter, temporary files, and private information about Internet activity.
- Back up photos, music, and personal documents—along with everything else on your computer—so you can recover anything you need whenever you want.
