Mike Brown, *President and Chief Executive Officer*

Thomas Seifert, *Executive Vice President and Chief Financial Officer*

Scott Taylor, *Executive Vice President, General Counsel and Strategy*

CORPORATE OVERVIEW

At Symantec, we protect your information wherever it's stored or accessed.

Protecting information around the world requires great people. As the 4th largest software company in the world, there are more than 20,000 people in 50 countries working on products and services that protect what matters most to you every day – from your company's most important information to your family photos.

Everything we do begins with what we've learned about keeping people's information secure. We operate a worldwide cyberintelligence threat network that positions us to proactively address where you're most vulnerable, and we're developing new offerings in key growing markets such as mobile, cloud, appliances, backup, data-loss prevention, managed security services and authentication.

This network captures worldwide security intelligence data that gives Symantec analysts unparalleled sources of data to identify and analyze, to deliver protection and provide informed commentary on emerging trends in attacks, malicious code activity, phishing and spam.

SOFTWARE AND SERVICES PORTFOLIO

Our market-leading solutions help customers ensure that their information is secure and well-managed.

Symantec's award-winning technology in our Norton™ brand of Consumer Products for individual users, home offices and small businesses focus on delivering online protection for our customers, their systems and the things they value most – photos, documents, videos and music – without compromising system performance. Our Norton brand of products and services range from Internet security and backup and recovery solutions to PC tune-up and PC help services.

- Consumer Endpoint Security (#1 market position¹)

Symantec Security and Compliance focuses on providing organizations of all sizes with solutions for endpoint security and management, data loss prevention, encryption and authentication. Our standardized security and management solutions help ensure that information, identities, infrastructure and processes can be protected, managed and controlled across physical and virtual platforms.

- Consumer Security Software (#1 market position¹)
- Enterprise Endpoint Protection Platform (#1 Market position², A Leader in Gartner Magic Quadrant³)
- Messaging Security (#1 Market position⁴)
- Enterprise Content Aware Data Loss Prevention (#1 market position⁵, A Leader in Gartner Magic Quadrant⁶)
- Security Management (A Leader in Gartner Magic Quadrant⁷)
- SSL Certificates (#1 market position⁸)
- Client Management Tools (A Leader in Gartner Magic Quadrant⁹)

Symantec Storage and Availability Management focuses on providing organizations with storage management and high availability as well as data protection solutions across heterogeneous storage and server platforms.

- Email Archiving (#1 market position¹⁰, A Leader in Gartner Magic Quadrant¹¹)
- E-Discovery (#1 market position¹², A Leader in Gartner Magic Quadrant for E-Discovery Software¹³)
- Backup and Recovery (#1 market position¹⁰, A Leader in Gartner Magic Quadrant for Backup Software and Integrated Appliances ¹⁴)

Symantec Global Services offers deep technical knowledge and expert resources including Managed Services, Enterprise Support and Education Services. With an expert staff of professionals and an extensive partner network, we help customers address information security, availability, storage and compliance challenges from the endpoint to the data center.

Corporate Responsibility

Symantec makes the world a safer place by helping people, businesses, and governments protect and manage their information so they can focus on achieving their goals. We're committed to executing this mission while operating with integrity, respect for the environment, and a commitment to positive social impact.

In 2014, we launched the Symantec Cyber Career Connection, our first-ever signature program aimed at attracting, educating and training underserved young adults to enter the exciting and in-demand field of cybersecurity. Visit http://www.symantec.com/corporate_responsibility/ to learn more about our corporate responsibility commitments to our people, your information, and the world.
