

# Symantec Data Loss Prevention Cloud Service for Email with Cloud Console

## At-a-Glance:

### Complete, SaaS-Based Cloud Email Security

- Superior inbound and outbound email protection for Office 365 and Gmail
- 100% cloud-based solution combines data loss prevention and threat protection technologies to protect you against breaches, phishing, malware and spam

### Industry-Leading Data Loss Prevention

- Catches and stops sensitive emails from leaving your organization's public cloud presence on Office 365 and Gmail
- Highly accurate content inspection of outbound email traffic prevents data loss other solutions miss

### Industry-Leading Email Threat Protection

- Safeguards users from inbound email threats, such as spear phishing, malware and spam in Office 365 and Gmail
- Multi-layered detection technologies stop new and sophisticated threats such as ransomware and business email compromise

## Move to Cloud Email Quickly and Securely

Businesses who value the low maintenance and high convenience of cloud computing are increasingly shifting corporate email to the cloud. In fact, Gartner<sup>1</sup> found that 13 percent of all public companies are using Microsoft or Google cloud email services. As email moves out of server rooms and into public clouds, corporate information becomes more vulnerable to data breaches and compliance issues.

Symantec protects sensitive data in the cloud against breaches, spear phishing, malware, and spam with the most complete cloud email security solution called the Data Loss Prevention (DLP) Cloud Service for Email with Cloud Console.

By leveraging Symantec's industry-leading data loss prevention and threat protection technologies, the DLP Cloud Service for Email with Cloud Console lets you move email to the cloud with confidence. With powerful security, risk management, and compliance controls for Microsoft Office 365 and Gmail, Symantec protects sensitive data from both inbound and outbound email threats.

---

**With Symantec, you get powerful DLP and threat protection capabilities that go beyond the basic compliance-driven security of Office 365 and Gmail.**

## Sensitive Data Protection for Office 365 and Gmail

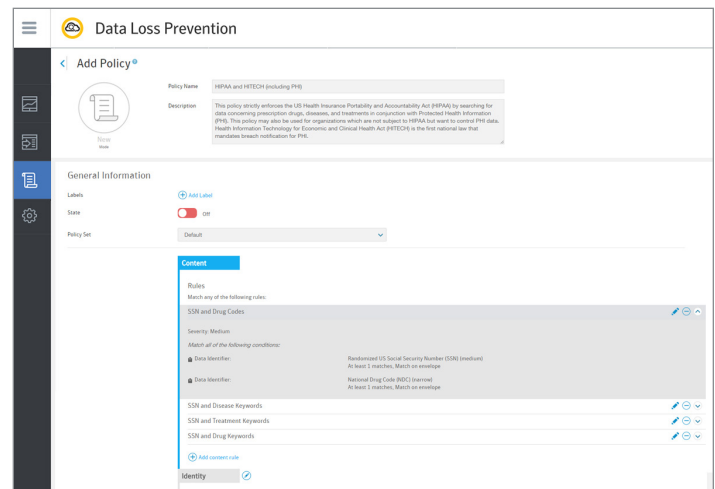

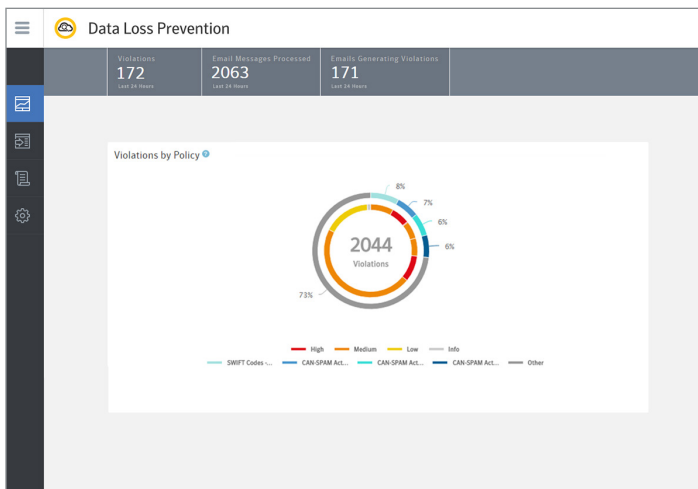

All too often, employees expose sensitive information in outbound email messages and attachments. Whether accidental, negligent or malicious, stopping data loss is essential to any corporate security program. Symantec's DLP Cloud Service for Email with Cloud Console extends content-aware data loss prevention capabilities to Office 365 and Gmail. With a fully cloud-based DLP detection service and management console that requires zero on-premises infrastructure, you can be up and running in as little as one hour.

Symantec's solution inspects the content and context of outbound email in real-time by leveraging built-in intelligence and content detection capabilities to analyze both the message content and its metadata. As a result, you can accurately identify sensitive data with minimal false positives so you can focus on the real incidents. Delivery of emails can be blocked or remediated in real-time.

The DLP Cloud Console makes it easy to manage your organization's data loss policies, investigate and remediate policy violations, and monitor what's going on – all from one sleek, easy-to-use interface that requires no on-premises software or appliances to be deployed. It leverages Symantec's industry-leading DLP technology, giving you the peace of mind that only a proven, enterprise-grade solution can provide.

### Features

- **Powerful DLP capabilities for Office 365 Exchange Online and Gmail for Work**
- **100% cloud-based data detection service and console**
- **Comprehensive library of built-in policy templates and Data Identifiers**
- **Integrated policy violation investigation with automated and manual remediation capabilities**

## Enhance Symantec Email Security.cloud with the DLP Cloud Service for Email

Symantec's DLP Cloud Service for Email solution leverages and enhances customers' existing investments in Symantec Email Security.cloud<sup>2</sup>. With DLP Cloud Service for Email deployed, Email Security.cloud customers get DLP monitoring and prevention capabilities without installing any new on-premises infrastructure.

## Email Protection Against Attacks, Phishing, Malware and Spam

The DLP Cloud Service for Email with Cloud Console also extends industry-leading threat and anti-spam protection from Symantec Email Security.cloud<sup>2</sup> to Office 365 and Gmail. You can stop new and sophisticated email threats such as business email compromise and ransomware with multi-layered detection technologies such as advanced heuristics and deep link evaluation. Email Security.cloud also identifies and stops the most stealthy and persistent threats in cloud email through insights from one of the world's largest intelligence networks, the Symantec Global Intelligence Network. In addition, you can automatically safeguard the security and privacy of confidential emails by encrypting specific outbound emails using policy-based encryption capabilities.

### Features

- **Industry-leading threat and anti-spam protection for Office 365 Exchange Online and Gmail for Work**
- **Multi-layered detection stops new and sophisticated email threats**
- **Deep link evaluation protects users against spear phishing**
- **Policy-based encryption safeguards the security and privacy of confidential emails**

## System Requirements

Microsoft Office 365 Exchange Online or Gmail for Work

## Why Symantec?

We give you the most complete cloud email security solution with two superior layers of protection against data breaches and email threats that go beyond the basic compliance-driven security of Office 365 and Gmail.
