

Symantec™ Security Awareness Services

Create organization-wide security literacy

Data Sheet: Symantec Cyber Security Services

Humans are the weakest link. Empower them to be an asset, not a detriment to your security. Technology is moving forward at a pace that leaves security practitioners struggling to keep up. In this current landscape, we need to empower everyone to play their part and recognize the vulnerabilities that pertain to their role in an organization.

Symantec Security Awareness Service provides video-based educational content designed to meet industry related compliance mandates, as well as the security standards required of each position in your organization. Drive lasting change in employees with education that makes them a part of your organization's cybersecurity conversation.

Topics Covered Include:

- Recognizing Phishing Attacks
- Safely Working Remotely
- Creating and Remembering Stronger Passwords
- Social Media Best Practices
- Laws and Legalities
- Physical Security
- Social Engineering in the Real World
- Securing Network Communications
- Remote Access Security
- Incident Response Basics
- Data Protection and Destruction
- Overview of HIPAA
- Overview of PCI DSS
- and many more.

Comprehensive and Integrated Solutions for Success

A successful cybersecurity program requires a comprehensive strategy and integration across technology and people. Each offering in Symantec's Cyber Security Services portfolio—**Managed Security Services** for advanced threat monitoring; **DeepSight™ Intelligence** for actionable technical and strategic threat intelligence; **Incident Response** for fast containment and eradication of a threat; and **Cyber Skills Development** for strengthening an entire organization's ability to recognize and prevent advanced attacks—is designed to work together and improve the speed and effectiveness of a security program.
