Recommended Preparation Materials

Recommended Courses and Required Experience

- Symantec Data Loss Prevention 15.0 Administration (Required)
  - DLP 15.0: Data Loss Prevention Landscape
  - DLP 15.0: Overview of Symantec Data Loss Prevention
  - DLP 15.0: Identifying and Describing Confidential Data
  - DLP 15.0: Locating Confidential Data Stored on Premises and in the Cloud
  - DLP 15.0: Understanding How Confidential Data is Being Used
  - DLP 15.0: Educating Users to Adopt Data Protection Practices
  - DLP 15.0: Preventing Unauthorized Exposure of Confidential Data
  - DLP 15.0: Remediating Data Loss Incidents and Tracking Risk Reduction
  - DLP 15.0: Enhancing Data Loss Prevention with Integrations

- Symantec Data Loss Prevention 15.0 Differences eLearning (Required)
  Available in the Symantec LearnCentral eLibrary at: [https://learn-education.symantec.com](https://learn-education.symantec.com)
  - DLP 15.0: Differences Training – Endpoint Enhancements
  - DLP 15.0: Differences Training – CloudSOC Integration
  - DLP 15.0: Differences Training – Discover
  - DLP 15.0: Differences Training – Enforce
  - DLP 15.0: Differences Training – Appliance
  - DLP 15.0: Differences Training – Appliance Demo

- Symantec Data Loss Prevention 15.0 Install and Deploy eLearning (Required)
  Available in the Symantec LearnCentral eLibrary at: [https://learn-education.symantec.com](https://learn-education.symantec.com)
  - DLP 15: Symantec Data Loss Prevention Overview
  - DLP 15: Preparing to Install Symantec Data Loss Prevention
  - DLP 15: Installing Oracle and the Symantec DLP Enforce Server
  - DLP 15: Installing Symantec Data Loss Prevention Detection Servers
  - DLP 15: Installing a Symantec Data Loss Prevention OCR Server
  - DLP 15: Installing the Symantec Data Loss Prevention Endpoint Agent
  - DLP 15: Upgrading Symantec Data Loss Prevention

- Required 6-9 months regular experience working with the entire Symantec Data Loss Prevention 15.0 product suite in a production or lab environment.
Product Documentation Referenced in This Exam

- Data Loss Prevention Technical Support articles and alerts including, but not limited to:

- Symantec Data Loss Prevention 15.0 Documentation Library
  - Symantec Data Loss Prevention Administration Guide
  - Symantec Data Loss Prevention System Requirements and Compatibility Guide
  - Symantec Data Loss Prevention System Maintenance Guide
  - Symantec Data Loss Prevention Installation Guide (Windows or Linux)
  - Symantec Data Loss Prevention Upgrade Guide (Windows or Linux)

- Symantec Data Loss Prevention Cloud Prevent for Microsoft Office 365 Implementation Guide

- Symantec Data Loss Prevention Incident Reporting and Update API Developers Guide

- Symantec Data Loss Prevention Cloud Detection Service Getting Started Guide

- Symantec Data Loss Prevention Oracle 11g Installation Guide
## Exam Objectives

The following tables list the Symantec SCS Certification exam objectives for the DLP 15.0 exam and how these objectives align to the corresponding Symantec courses and the referenced documentation. This exam is for an entire product suite that touches almost every part of a network and cloud infrastructure.

For more information on the Symantec Certification Program, visit [http://go.symantec.com/certification](http://go.symantec.com/certification)

### EXAM SECTION 1: Overview and Architecture

## Exam Objectives

### Topics from DLP 15.0 Documentation and Courses

- **Course**: Symantec Data Loss Prevention 15.0 Administration
- **Module**: DLP 15.0: Overview of Symantec Data Loss Prevention
- **Documentation**:
  - Symantec Data Loss Prevention Administration Guide
    - Introducing Symantec Data Loss Prevention
    - Installing and Implementing Detection Servers
    - Optical Character Recognition
    - Network/Endpoint Discover
  - Symantec™ Data Loss Prevention System Requirements and Compatibility Guide
    - Hardware Requirements
  - Other chapters with overviews of products in the Symantec Data Loss Prevention product suite

---

## EXAM SECTION 2: Installation and Configuration

### Exam Objectives

Describe how to install Symantec Data Loss Prevention 15.0

### Topics from DLP 15.0 Documentation and Courses

- **Documentation**:
  - Symantec Data Loss Prevention Administration Guide
    - Install additional Detection capabilities
    - Managing Enforce Server services and settings
  - Symantec Data Loss Prevention Installation Guide (Windows or Linux)
    - Planning a DLP Install
| Exam Objectives                                                                 | Topics from

### Exam Objectives

**Troubleshoot the installation/upgrade process using Symantec tools.**

**Topics from**

*DLP 15.0 Documentation and Courses*

- **Documentation:**
  - Tech Support Knowledge Base: https://support.symantec.com
  - Symantec Data Loss Prevention Upgrade Guide
    - Upgrade Phases
    - Database preparation
  - Symantec Data Loss Prevention Installation Guide

**Describe how to configure Cloud Detection Service and integrate it with Symantec CloudSOC to monitor and protect data in motion and data at rest in cloud applications.**

- **Documentation:**
  - Tech Support Knowledge Base: https://support.symantec.com
  - Symantec Data Loss Prevention Administration Guide
    - Working with Cloud Connectors
    - Application Detection
  - Symantec Data Loss Prevention Installation Guide
  - Installing an Enforce Server

### Sample Exam Questions

1. **What Symantec Data Loss Prevention product can monitor and block FTP transmissions?**
   - A. Network Monitor
   - B. Network Prevent for Web
   - C. Network Prevent for Email
   - D. Network Discover

2. **An organization wants to implement Endpoint Prevent and Endpoint Discover for 120,000 endpoint computers using transient connections.**

   What is the minimum number of Endpoint Servers that an organization would need to install?
   - A. 4
   - B. 6
   - C. 8
   - D. 10
3. In which two (2) ways can the default listener port for a detection server be modified? (Select two.)
   A. Through the Enforce user interface under System > Overview
   B. By editing the Communication.properties file on a detection server
   C. Through the Enforce user interface under Manage > Policies
   D. By editing the MonitorController.properties file on a detection server
   E. By editing the model.notification.port file on a detection server

4. A state governmental agency has digitized paper applications received from residents over the past several years, and recently the agency deployed a Form Matching policy to prevent these completed applications from leaving their network. However, when employees try to send official publications, blank application forms, or other non-confidential PDF documents externally, the Form Matching process seems to run much slower than expected.

   What can the agency do to improve Form Matching performance?
   A. Replace all the files in the Form Matching profile's image gallery with higher resolution PDFs.
   B. Reduce the Filling Threshold setting in the Form Matching policy's rules to a value of 4 or less.
   C. Create fewer Form Matching profiles with a larger number of blank forms in each image gallery.
   D. Protect the files with an EDM policy instead because EDM is inherently more efficient.

5. An organization is monitoring email based on DLP policies but is now ready to implement automated blocking. As part of the designed incident response process, the Incident Response team wants to foster awareness among end users by keeping them informed of any email that is blocked.

   Which response rule configuration will allow a DLP Administrator to block the email while providing context and incident information to the email sender?
   A. Combine a Block SMTP Message with an Add Note action that includes incident variables
   B. Combine a Modify SMTP Message with an Add Note action that includes incident variables
   C. Create Block SMTP Message and include incident variables in the Bounce Message to Sender field
   D. Combine a Block SMTP with a Send Email notification action that includes incident variables

6. Which two (2) incident conditions are available to configure Automated Response Rules? (Select two.)
   A. Incident Status
   B. Sender Groups
   C. Protocol or Endpoint Destination
   D. Incident Match Count
   E. File Size
7. Which response rule action will be ignored when using an Exact Data Matching (EDM) policy?
   
   A. Network Prevent: Remove HTTP/HTTPS Content
   B. All: Send Email Notification
   C. Network Protect: Copy File
   D. Endpoint Prevent: Notify

8. Which two (2) steps should an DLP Administrator take to analyze traffic over port 578 TCP? (Select two.)
   
   A. Create the port 578 under System > Settings > Protocols > Add Protocol.
   B. Add port 578 to the existing signature-based HTTP protocol under System > Settings > Protocols > HTTP.
   C. Create port 578 under System > Servers and Detectors > Traffic > Add Protocol.
   D. Enable Network Monitor detection for port 578 under System > Servers and Detectors > Overview Server > Detector Detail > Configure.
   E. Enable Network Monitor detection for port 578 with a detection rule assigned to an active policy under Manage > Policy > Policy List.

9. A Chief Information Security Officer (CISO) wants to consolidate DLP Incident Remediation triage and follow up using a third-party Help Desk through Web Services.

   Which document advertises all of the available operations in the Incident Reporting and Update API?
   
   A. Simple Object Access Protocol (SOAP)
   B. Web Services Description Language (WSDL)
   C. Simple Oriented Access Protocol (SOAP)
   D. Web Services Definition Language (WSDL)

10. An incident responder is viewing a discover incident snapshot and needs to determine which information to provide to the next level responder.

    Which information would be most useful in assisting the next level responder with data cleanup?
    
    A. Incident Details: Message Body content
    B. Data Owner: From Data Insight
    C. Incident Details: File Owner metadata
    D. Access Information: File Permissions
11. A DLP Administrator is creating a role that contains an incident access condition that restricts users from viewing specific incidents.

Which two (2) conditions can the administrator specify when creating the incident access condition in a role? (Select two.)

A. File type
B. Custom attribute
C. Recipient
D. File size
E. Policy group

12. An incident responder sees basic incident data but is unable to view specific details of the incident.

What could be wrong with the configuration in the incident responder's role?

A. View option is selected, and all display attributes are deselected.
B. Incident Access tab conditions are specified.
C. Available Smart Response rules are deselected.
D. Server administration rights are deselected.

13. Which detection method should a DLP Administrator utilize to block files containing credit card numbers from being transferred from an endpoint computer to an external USB drive?

A. Keywords
B. Exact Data Matching
C. Vector Machine Learning
D. Data Identifier

14. A Network Monitor server has been installed. The server is receiving traffic but Enforce is NOT showing incidents. Running Wireshark indicates that the desired traffic is reaching the detection server.

What is the most likely cause for this behavior?

A. The mirrored port is sending corrupted packets.
B. The wrong interface is selected in the configuration.
C. The configuration is set to process GET requests.
D. The communication with Enforce is interrupted.
15. Which two (2) pieces of system information are collected by Symantec Data Loss Prevention Supportability Telemetry? (Select two.)

   A. Currently installed version of the Enforce Server
   B. Number of policies currently deployed
   C. Cumulative statistics regarding network traffic
   D. File types for which there are incidents
   E. Number of system alerts generated daily

16. Under which circumstances does CloudSOC refer a file for DLP Scanning?

   A. When it matches parameters configured in Application Detection Configuration
   B. When it matches parameters configured in the Enforce policy
   C. When it matches parameters configured in Cloud Detection Service
   D. When it matches parameters configured in CloudSOC

Answer Key:
1. B
2. A
3. A, B
4. C
5. D
6. C, D
7. D
8. A, D
9. B
10. B
11. B, E
12. A
13. D
14. D
15. A, D
16. A
