1. Encrypted Traffic is Pervasive. Manage it.

SSL traffic is growing at 20% per year.

SSL/TLS traffic is pervasive and changing no signs of slowing down.

SSL/TLS is used by 1 in 3 enterprises.

SSL/TLS traffic is pervasive and showing no signs of slowing down:

- Malware families using SSL traffic:
  - [Image]

- Blue Coat Labs found dramatic increases in SSL use in the last two years.

- Current security solutions have limited visibility or control of SSL/TLS traffic.

3. Encrypted Traffic Management (ETM) is the Best Solution. Simplify Your Security.
