## Delivering on Our Promises, Developing Our Portfolio, Defining the Future

Nearly two years ago we announced our intention to become the leading pure play cyber security company — and we're proud to say that's now a reality. With the acquisition of Blue Coat, Symantec is well positioned to define the future of cybersecurity.

## Symantec Is Committed to Solving Today's Biggest Security Challenges

**ESG Research:** "Based upon our quantitative research of cyber security and IT professionals, organizations are clearly excited about the prospects of getting access to the larger and more comprehensive cyber security portfolio from a combined Symantec-Blue Coat entity."

ESG Brief, Symantec-Blue Coat Merger Sentiment, July 2016

### Helping Customers Securely Embrace the Cloud

- Define cloud application policies;
- Control access and movement of data;
- Make decisions on encryption and tokenization

*Symantec is the only provider that can deliver this end-to-end solution*

### Securing the Mobile Workforce

- The walls of organizations have expanded. Today's users are on mobile devices with access to cloud applications and they expect productivity on the go.

*Symantec's intelligent endpoint and cloud gateway follows users anywhere they go — authenticating and protecting them from malicious activities*

### Staying Ahead of Advanced Threats

- Today's adversaries are more sophisticated than ever, zero-days, Crypto-ware and previously unseen malware are on the rise

*Symantec meets this challenge and delivers protection across all of the major control points; email, network, endpoint, datacenter and cloud servers*
