

Symantec Consulting

Critical expertise
at your service

The number of breaches increased 23% in 2014¹

5 out of every 6

large companies (2,500+ employees) were targeted with spear-phishing attacks in 2014²

That's a **40 percent**³
increase over the previous year

The threats increase, but security software can only protect you if it's **properly installed, managed, and optimized** for your particular environment.

Let Symantec Consultants help you

Optimize Security

Maximize Return

Minimize Risk

Healthcare
and Entertainment

Over **100 consultants** with an average of **15 years** of industry experience, many holding certifications in critical areas including:

Certified Information Systems Security Professional (CISSP):

Not only is the CISSP an objective measure of excellence, but also a globally recognized standard of achievement.

Global Information Assurance Certification - Certified Incident Handler (GIAC-GCIH):

GCIH certification focuses on detecting, responding, and resolving computer security incidents.

Certificate of Cloud Security Knowledge (CCSK):

#1 on CIO.com's list of Top Ten Cloud Computing Certifications - a broad foundation of knowledge about cloud security, from architecture, governance, and compliance to operations, encryption, virtualization, and more.

“80% of CIOs worldwide say they consider partnerships with external IT service and support providers to be critical or very important to the overall success of their IT organization.”⁴
