The number of breaches increased 23% in 20141
5 out of every 6
large companies (2,500+ employees) were targeted with spear-phishing attacks in 20141
That’s a 40 percent increase over the previous year

The threats increase, but security software can only protect you if it’s properly installed, managed, and optimized for your particular environment.

Over 100 consultants with an average of 15 years of industry experience, many holding certifications in critical areas including:

**Certified Information Systems Security Professional (CISSP):** Not only is the CISSP an objective measure of excellence, but also a globally recognized standard of achievement.

**Global Information Assurance Certification - Certified Incident Handler (GIAC-GCIH):** GCIH certification focuses on detecting, responding, and resolving computer security incidents.

**Certificate of Cloud Security Knowledge (CCSK):** #1 on CIO.com’s list of Top Ten Cloud Computing Certifications - a broad foundation of knowledge about cloud security, from architecture, governance, and compliance to operations, encryption, virtualization, and more.

80% of CIOs worldwide say they consider partnerships with external IT service and support providers to be critical or very important to the overall success of their IT organization.2,3,4
