

SYMANTEC SOFTWARE SOLUTIONS PVT.LTD. RECEIVES THE 2017 FROST & SULLIVAN ENDPOINT SECURITY VENDOR OF THE YEAR AWARD

“Every endpoint is a soft target for a cyber-criminal, no matter how well it is connected to the network. Symantec provides one of the most comprehensive Endpoint Protection suites that is currently available in the market and adds advanced security features like Endpoint Detection and Response (EDR) solution to better address the changing threat landscape. The company has shifted to a signature-less prevention strategy with its Symantec Endpoint Protection 14 that refers to lesser dependence on previous generations of the product.”

Frost & Sullivan’s India Endpoint Security Vendor of the Year Award acknowledges companies that show exemplary performance in terms of revenue and revenue growth, market share and market share growth, portfolio diversity and technology roadmap & vision with belted achievements under their names.

Symantec Endpoint Protection (SEP) 14 has been introduced in the market with multiple forms of machine learning and added behavioral heuristics as enhancements to its endpoint anti-malware solutions. In this release, Symantec reduced the footprint of its signature database, and introduced additional streamlining of the endpoint agent to improve performance and effectiveness. In addition to this, the company introduced SEP Cloud, targeted for the SMB segment that is enriched with all industry leading core security functionality which enables self-service deployment, user centric experience, and device management. Data suggest all major enterprises in India use SEP, as the acceptance of the solution looks impressive in the country.
